"Assessing the Risks and Opportunities: The Evolving Landscape of Affiliate Revenue"

A trend-based segmentation of 20 affiliate partners, verified across PostgreSQL, BigQuery, and PySpark, to prioritize retention and budget decisions for the coming quarter.

THE QUESTION WE'RE ANSWERING

Objectives

Business problem: Total revenue reveals who dominates the market today, but it doesn't indicate who's facing challenges or seizing new opportunities.

Decision to support: Determining the key areas to concentrate our partner-retention efforts and allocate our commission budget for the upcoming quarter across 20 affiliate partners is essential.

Metric that matters most: Evaluate the revenue trend by comparing the average monthly revenue of the first half to that of the second half, rather than focusing solely on total revenue.

AT A GLANCE

20

affiliate partners

R8.22M

total program revenue

18

months tracked

Key Questions

1. Identify the partners that are declining and assess the potential revenue at risk.
2. Identifying which partners are experiencing growth and exploring ways to accelerate that momentum.
3. Where should we confidently prioritize our partner-management efforts and commission budget for the upcoming quarter?

WHAT WE ANALYSED

560

daily
performance
records

20

affiliate partners

18

months of history
(Jan 2025–Jun
2026)

Data Overview

SOURCE & VARIABLES

Source: Internal tracking file for affiliate partner performance. Key variables include clicks, conversions, revenue, commission paid, partner type, campaign, device type, and conversion rate. We derive the average monthly revenue per partner by comparing the first half of the period with the second half.

DATA QUALITY NOTES

- A few revenue and commission values are marked as estimated instead of actual figures.
- The conversion rate is calculated by dividing conversions by clicks; any rows with zero clicks are excluded from this calculation.
- All 20 partners have data for both halves of the comparison, so the trend analysis is comprehensive.

Executive Summary

Revenue is genuinely split, not skewed to decline.

Growing partners now hold a marginally larger share of program revenue (48.6%, R4.00M) than At Risk partners (46.7%, R3.84M) — a real risk, but not a runaway one.

The risk is concentrated in 10 of 20 partners.

PetLoversHub (−45.8%), StyleBlog Daily (−42.4%), and HomeAndGardenTips (−41.3%) lead the decline.

The single largest partner is actually growing.

CampusCoupons, the top-revenue partner at R615K, is up 10.6%. The real concern is AutoDealsDaily (R548K, 2nd-largest), which is down 21.7%.

Recommendation: prioritize AutoDealsDaily for retention.

It is the only large-revenue partner that is both sizeable and declining — the highest-leverage single action available this quarter.

REVENUE SHARE BY HEALTH CATEGORY

\$9.17M total program revenue across 20 partners

—
HOW WE GOT HERE

Analytical Approach

For each partner, we compared average monthly revenue across two equal halves of the period, then grouped partners by how much that trend moved.

FIRST HALF

Jan—Sep 2025

avg. monthly revenue

SECOND HALF

Oct 2025—Jun 2026

avg. monthly revenue

% CHANGE

per partner

first half → second half

■ AT RISK

down more than 10%

■ STAGNANT

within $\pm 10\%$ (roughly flat)

■ GROWING

up more than 10%

Finding 1 of 3

10 of 20 partners are trending down

WHAT HAPPENED

10 of 20 partners declined by more than 10% in average monthly revenue, representing R3.84M, or 46.7% of program revenue.

EVIDENCE

PetLoversHub (–45.8%) and StyleBlog Daily (–42.4%) show the steepest declines, but neither is among the program's top-5 revenue partners.

WHY IT MATTERS

This is a broad, mid-tier decline rather than a collapse of the top 2 partners — it needs a program-wide retention push, not a single crisis conversation.

Finding 2 of 3

The biggest partner is healthy, while, the 2nd biggest is not

Partner	Total Revenue	Trend	Status
CampusCoupons	R615,044	+10.6%	Growing
AutoDealsDaily	R547,627	-21.7%	
DealSeeker247	R523,413	+95.9%	Growing
BudgetBeautyBlog	R496,897	+44.0%	Growing
ParentingPulse	R464,667	+33.2%	Growing
FitLifeCoach	R450,492	-25.0%	At Risk

WHY IT MATTERS

Of the 6 largest partners by revenue, only 2 are At Risk. This is a healthier picture than a simple leaderboard suggests — but AutoDealsDaily stands out as the one large, high-revenue partner that is both sizeable and actively declining, making it the single highest-leverage retention target this quarter.

Finding 3 of 3

9 partners are growing, some sharply

WHAT HAPPENED

9 partners grew by more than 10%, contributing R4.00M (48.6% of program revenue) — DealSeeker247 leads at +95.9%.

EVIDENCE

3 of the 6 highest-revenue partners in the program (CampusCoupons, DealSeeker247, BudgetBeautyBlog) are in this growing group.

WHY IT MATTERS

Unlike the At Risk group, growth here is not confined to small, marginal partners — it includes genuine revenue leaders, which is a stronger foundation to build on.

Business Impact

Area	Current Position	Opportunity / Risk
Declining partners (At Risk)	\$3.70M in revenue (40% of total), actively declining	Stabilizing these partners protects nearly half of program revenue
Growing partners	\$2.08M in revenue (23% of total), up 30%+	Compounding this trend could offset At Risk losses over time
Revenue concentration	Top 2 partners by size are both down more than 70%	Root-causing GadgetGuru / EcoLivingToday is the single highest-leverage action

Interpretation: If the At Risk group continues to decline at its current rate, and the Growing group fails to scale quickly enough to compensate, total program revenue is likely to decrease — even though 60% of partners remain stable or are experiencing growth.

PRIORITIZED ACTION PLAN

Recommendations

#	Action	Owner	Priority	Expected Benefit
1	Initiate retention discussions with GadgetGuru and EcoLivingToday immediately to identify the cause of their 70%+ decline (creative fatigue, competitive pressure, broken tracking) before the next reporting cycle.	Partner / Affiliate Management	High	The program currently protects up to \$1.58 million, which represents 17% of its revenue, but it is experiencing a significant decline.
2	Reallocate the incremental commission budget to the five growing partners, particularly DealSeeker247 and WellnessWeekly, to enhance their current momentum.	Marketing / Commission Strategy	High	Enhances the revenue base of \$2.08 million during its peak growth period.
3	Establish a quarterly check-in schedule for the eight stagnant partners, focusing on FitLifeCoach and CouponKing, as they are closest to the at-risk threshold.	Partner / Affiliate Management	Medium	Take early action on the \$3.38 million in flat revenue before it falls into the "At Risk" category.
4	Integrate the first-half versus second-half trend comparison into our quarterly reports to ensure ongoing insights and continuous learning, rather than limiting the analysis to a single occurrence.	Analytics / BI Team	Medium	It highlights trend-based risks that may not be visible in a traditional revenue leaderboard, helping to identify potential issues in the future.

NEXT STEPS

Immediate Actions (Next 30 Days)

- Please arrange retention calls with GadgetGuru and EcoLivingToday.
- Reallocate a specific portion of the commission budget to the five growing partners.

Data Gaps to Address

- The root-cause fields, such as competitor activity and creative refresh dates, are not currently being captured.
- There is no customer-level retention data available to connect partner performance with end-customer outcomes.

Additional Analyses Required

- Analyze the decline of At Risk partners by campaign and device type to identify the main driver.
- Examine whether tracking or attribution problems are impacting the two steepest decliners.

Monitoring & Dashboard

- Develop a quarterly dashboard categorizing At Risk, Stagnant, and Growing.

KEY TAKEAWAY

Program revenue is roughly split between growing and declining partners, not dominated by decline. AutoDealsDaily, the one large partner that is both sizeable and at risk, is the single highest-leverage retention target this quarter.

Thank you

Revenue by Category & Top Products

Revenue by Category

Top 10 products by Revenue

Category	Orders	Avg Order
Clothing	198	R1,623
Books	215	R1,457
Home	200	R1,498
Electronics	194	R1,365
Sports	186	R1,225

Clothing leads on total revenue despite Books having more orders; the top 10 products cluster tightly (R74K–R91K each) — a broad, evenly-spread catalog rather than a hit-driven business.

Trends Over Time

APPENDIX B

Revenue by Category

Revenue stabilizes into a consistent R45K–R85K monthly range from 2024 onward.

Top 10 products by Revenue

The problem rate stays volatile and elevated for three years — no clear downward trend.

Both charts point to the same conclusion: the business itself is healthy and maturing, but order fulfillment problems are structural rather than a temporary or seasonal blip — which is why targeted fixes, not time, are needed to resolve them.
